PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building and leading development of large-scale web applications across HealthTech, logistics, fintech domains and enterprise software domains. Specialized in React, Angular, Next.js, and TypeScript, with full-stack capability in Golang, Node.js and NestJS. Proven track record of architecting scalable frontend systems, mentoring engineers, and delivering products end-to-end.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Dart, Solidity, HTML/CSS, SQL

Frontend: React, Angular, Next.js, React Native, TailwindCSS, TanStack Query

Backend: Node.js, NestJS, Spring Boot, .NET, Golang

Databases: PostgreSQL, MongoDB, MySQL, Firebase, Neo4j

Cloud & Tools: AWS, Azure, Git/GitHub, Stripe, RabbitMQ, Figma, Jira, Postman

Web3: Smart Contracts, Web3.js, Ethers.js, IPFS, Solidity

PROFESSIONAL EXPERIENCE

Software Engineer

Jul 2024 – Present

Vega IT

Novi Sad, Serbia

- Develop and maintain multiple large-scale web applications across internal tools, travel-compliance systems, and medical device management platforms serving hundreds of daily users.
- Partner with cross-functional teams to ship new features, optimize application performance, and standardize UI/UX consistency across products.
- Mentor junior developers, conduct technical interviews for engineering candidates, and lead onboarding for new team members.
- Drive code reviews, architectural discussions, and agile delivery while upholding high frontend quality standards.
- **Technologies:** Next.js, React, Angular, NestJS, Node.js, Golang, PostgreSQL, TailwindCSS, TanStack

Lead Frontend Engineer

Feb 2024 – Dec 2025

Fabricus.tech (Startup)

Novi Sad, Serbia

- Architected and led frontend development of enterprise web applications serving hundreds of daily users, owning the full software development lifecycle from concept to deployment.
- Spearheaded a courier-service management platform that evolved into a multi-tenant SaaS serving 10+ companies, significantly improving operational efficiency and internal workflows.
- Architected a real-time asset-tracking system with an emphasis on performance optimization and advanced data visualization for logistics monitoring.
- Led end-to-end UI/UX design and implementation, translating business requirements into intuitive, user-centered interfaces.
- Guided cross-functional teams through agile ceremonies and maintained code quality through comprehensive reviews; mentored developers on best practices and design patterns.
- **Technologies:** Angular, React, Firebase, Golang, TailwindCSS, TypeScript, AWS, MongoDB, Figma

Frontend Engineer

Jan 2023 – Feb 2024

Fabricus.tech (Startup)

Novi Sad, Serbia

- Built a comprehensive internal management platform for tracking employees, teams, projects, departments, equipment, and daily activities.

- Developed the frontend for a commercial fuel-tracking and management system, integrating with external platforms to enable real-time monitoring and cost optimization for fleet operations.
- Collaborated with backend developers and designers to translate requirements into responsive, user-friendly interfaces.
- Contributed across the full development lifecycle: requirements analysis, implementation, testing, and deployment.
- **Technologies:** Angular, React, Flutter, Dart, Go, Firebase, TailwindCSS, TypeScript, MongoDB

EDUCATION

Master's in Information Engineering and Data Science

Present

Faculty of Technical Sciences, University of Novi Sad Novi Sad, Serbia

- Relevant coursework: Data Science, Software Engineering, Finance.

Bachelor's in Information Engineering

Sep 2020 – Sep 2024

Faculty of Technical Sciences, University of Novi Sad Novi Sad, Serbia

- Relevant coursework: Data Science, Software Engineering, Algorithms.

PROJECTS & ACHIEVEMENTS

PETNET — Solana Mobile Hackathon 2025

2025

- Built a mobile-first blockchain application introducing NFT-based pet passports for securely storing pet identity and medical records on-chain; implemented veterinarian workflows for uploading treatment reports to IPFS via secure links.
- **Technologies:** Solana, React Native (Expo), Node.js, IPFS (Pinata), MongoDB, Wallet Adapter (Phantom, Solflare)

HopeBlock — Blockchain Everywhere Ethereum Hackathon 2025

2025

- Built a decentralized donations platform ensuring transparent, accountable charity contributions, using Ethereum smart contracts to track and verify donations on-chain.
- **Technologies:** Ethereum, Solidity, Angular, Node.js, IPFS, Web3.js, Ethers.js, Wallet Adapter (MetaMask)

Conferences

- Ethereum Sofia 2025 and Ethereum Novi Sad 2025 — Web3 ecosystem development, blockchain, and crypto-market analytics sessions.

ADDITIONAL

Languages: Serbian (Native), English (Advanced), Spanish (Elementary)

Certifications: Angular State Management & Testing; Project Architecture
